

3000MHz ~ 10000MHz

* Supplementary information on the next page

Supplementary information on situation of spectrum use

【3000—10000MHz】

Number	Frequency Band (MHz)	Principle use
[1]	3000—3400	Mainly used for maritime radars.
[2]	3400—3600	Aural and TV program transmission by broadcasters
	5850—5925、6425—6570 6870—7125	TV program transmission by broadcasters
[3]	3400—4800、7250—10250	Used for large-capacity data transmission limited to indoor use
[4]	4500—4800、6725—7025	Frequency bands identified for use for fixed satellite service.
[5]	4900—5000、5030—5091	Wireless Access System. The band 5030-5091MHz is temporarily used until 30 November 2012.
[6]	5000—5150	Reserved for the future use for Microwave Landing System (MLS).
[7]	5091—5250、6700—7025	Frequency bands allocated to the fixed-satellite service for feeder links to Low Earth Orbit satellites
[8]	5250—5350	Meteorological radars for public institutions, etc
[9]	5770—5850	DSRC
[10]	8025—8400	Data transmission from Earth exploration-satellites
[11]	8400—8500	Data transmission from scientific satellites
