

TEST REPORT

of

ARIB STD-T67

Equipment Under Test : RF-LINK MODULE
Model Name : RFHX-YA0H3-00
Applicant : iRevo-ASSA ABLOY Korea
Manufacturer : iRevo-ASSA ABLOY Korea
Date of Receipt : 2018.12.04
Date of Test(s) : 2018.12.21 ~ 2019.02.13
Date of Issue : 2019.02.13

In the configuration tested, the EUT complied with the standards specified above.

Tested By:

Changhyun Song

Date:

2019.02.13

Technical
Manager:

Hyunchoe You

Date:

2019.02.13

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

1. General information

1.1. Testing laboratory

SGS Korea Co., Ltd. (Gunpo Laboratory)

- Wireless Div. 2FL, 10-2, LS-ro 182beon-gil, Gunpo-si, Gyeonggi-do, Korea, 15807

All SGS services are rendered in accordance with the applicable SGS conditions of service available on request and accessible at <http://www.sgs.com/en/Terms-and-Conditions.aspx>.

Telephone : +82 31 688 0901

FAX : +82 31 688 0921

1.2. Details of applicant

Applicant : iRevo-ASSA ABLOY Korea

Address : 10F of JEI PLATZ Bldg., 186, Gasan Digital 1-ro, Geumcheon-gu, Seoul, 08502
Republic of Korea

Contact Person : Jang, Soo-kyung

Phone No. : +82 2 2107 5741

1.3. Description of EUT

Kind of Product	RF-LINK MODULE
Model Name	RFHX-YA0H3-00
Power Supply	DC 6.0 V
Operating Conditions	-20 °C ~ +50 °C
Frequency Range	449.712 5 MHz
Declaration power	9.33 mW
Modulation Technique	FSK
Antenna Type	Internal Antenna
Antenna Gain	-4 dBi

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

SGS Korea Co., Ltd. (Gunpo Laboratory) 4, LS-ro 182beon-gil, Gunpo-si, Gyeonggi-do, Korea, 15807 <http://www.sgsgroup.kr>

1.4. Test Equipment List

Equipment	Manufacturer	Model	Serial No.	Cal. Date	Cal. Authority	Cal. Method
Spectrum Analyzer	R&S	FSV43	100637	Jun. 03, 2018	SICT	c)
Signal Generator	Agilent	E8257D	MY51501169	Jul. 03, 2018	SICT	c)
Signal Generator	R&S	SMJ100A	100882	Jun. 15, 2018	SICT	c)
Attenuator	MCLI	FAS-12-10	1	Jun. 12, 2018	SICT	c)
Power Sensor	R&S	NRP-Z81	100748	Jun. 12, 2018	SICT	c)
Power Splitter	Mini-Circuits	ZFRSC-42-S+	UU1691438	Sep. 19, 2018	SICT	c)
DC Power Supply	Agilent	U8002A	MY50060028	Mar. 15, 2018	SICT	c)
DIGITAL MULTIMETER	HIOKI	DT4211	N0301231	Sep. 18, 2018	SICT	c)

Note;

- a): Calibration conducted by the National Institute of Information and Communications Technology or a designated calibration agency under Article 102-18 paragraph (1).
- b): Correction conducted pursuant to the provisions of Article 135 or Article 144 of the Measurement Law. (Law No. 51 of 1992)
- c): Calibration conducted in foreign countries, which shall be equivalent to the calibration conducted by the NICT or a designated calibration agency under Article 102-18 paragraph (1).
- d): Calibration conducted by using other equipment that listed above from a) to c).

1.5. Test method

Measurement was conducted by the following test method:

The test method of Ordinance Concerning Technical Regulations Conformity Certification etc. of Specified Radio Equipment in Annex 1, the Ministry of Internal Affairs and Communication notification in Annex 22-2 of Article 88, Paragraph 1 or the test method more than equivalent."

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

1.6. Summary of test results

The EUT has been tested according to the following specifications:

Applied standard : Radio equipment regulations and ARIB STD-T67		
Article Reference	Test item	Result
STD-T67 3.2	Frequency tolerance	Complied
STD-T67 3.2	Occupied bandwidth (99 %)	Complied
STD-T67 3.2	Antenna Power	Complied
STD-T67 3.2	Adjacent-channel leakage power	Complied
STD-T67 3.2	Intensity of spurious emission or unwanted emission	Complied
STD-T67 3.3	Secondary radiated emissions	Complied
STD-T67 3.4	Carrier sensing	Complied
STD-T67 3.4	Transmission time	Complied

1.7. Test report revision

Revision	Report number	Date of Issue	Description
0	F690501/RF-RTL013433	2019.01.17	Initial
1	F690501/RF-RTL013433-1	2019.02.08	Modified description of modulation technique and carrier sense level
2	F690501/RF-RTL013432-2	2019.02.13	Added transmission time test result

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

2. Frequency tolerance

2.1. Test Setup

2.2. Limit

The frequency tolerance shall be $\pm 4 \times 10^{-6}$ (4 ppm or below).

2.3. Test procedure

1. The EUT output is connected to a spectrum analyzer.
2. The EUT should be transmitted(Non-modulation) at a designated channel.
3. Set the spectrum analyzer in the following setting;
RBW: 300 Hz, VBW: 300 Hz, Span: 20 kHz, Sweep time: Auto and Detector mode: Peak

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

2.4. Test result

Ambient temperature : (23 ± 1) °C
 Relative humidity : 47 % R.H.

- Test frequency: 449.712 5 MHz

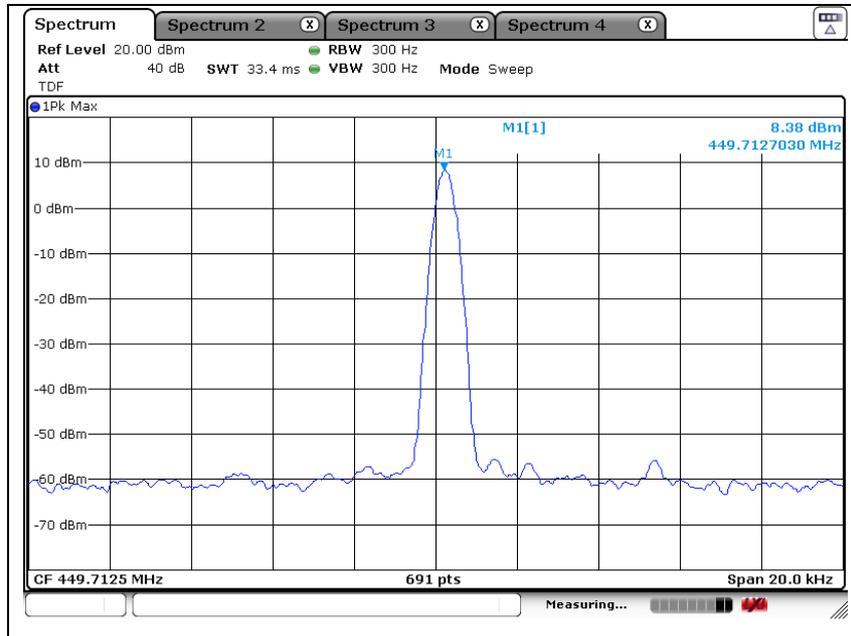

Test voltage(V _{d.c.})	Reading frequency	Frequency tolerance
V min = 5.4	449.712 7 MHz	0.44 ppm
V nom = 6.0	449.712 7 MHz	0.44 ppm
V max = 6.6	449.712 7 MHz	0.44 ppm

Note;

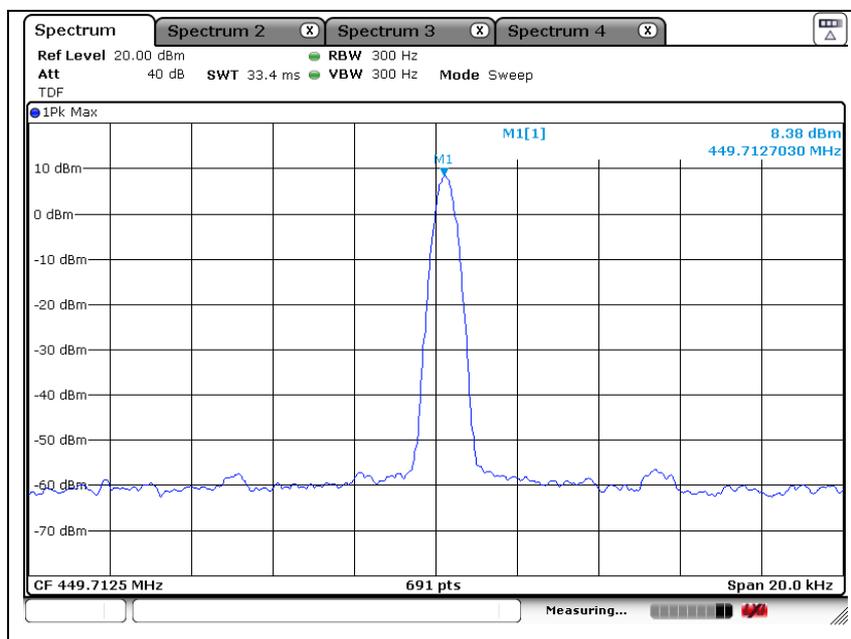

1. FT (ppm) = [(RF-MF)/MF] × 10⁶
 - FT: Frequency Tolerance, RF: Reading Frequency and MF: Measurement Frequency)

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

Test voltage : DC 5.4 V

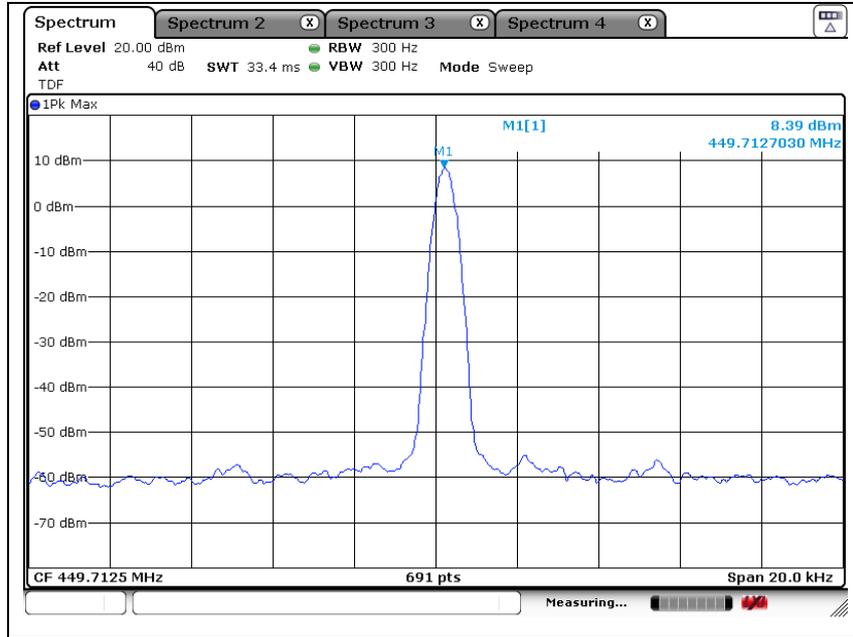

Test voltage : DC 6.0 V

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

Test voltage : DC 6.6 V

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

3. Occupied bandwidth (99 %)

3.1. Test Setup

3.2. Limit

The permissible value for a occupied bandwidth in the 400 MHz band shall be 8.5 kHz.

3.3. Test Procedure

1. The EUT output is connected to a spectrum analyzer.
2. The EUT should be transmitted at a designated channel.
3. Set the spectrum analyzer in the following setting;
 RBW : 300 Hz, VBW : 300 Hz, Span : 50 kHz.

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

3.4. Test result

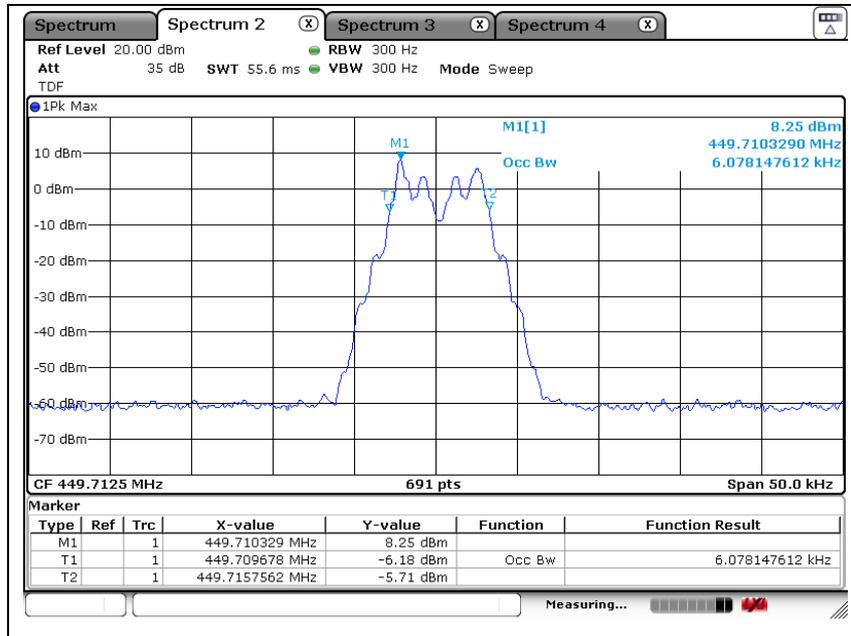

Ambient temperature : (23 ± 1) °C
 Relative humidity : 47 % R.H.

- Test frequency: 449.712 5 MHz

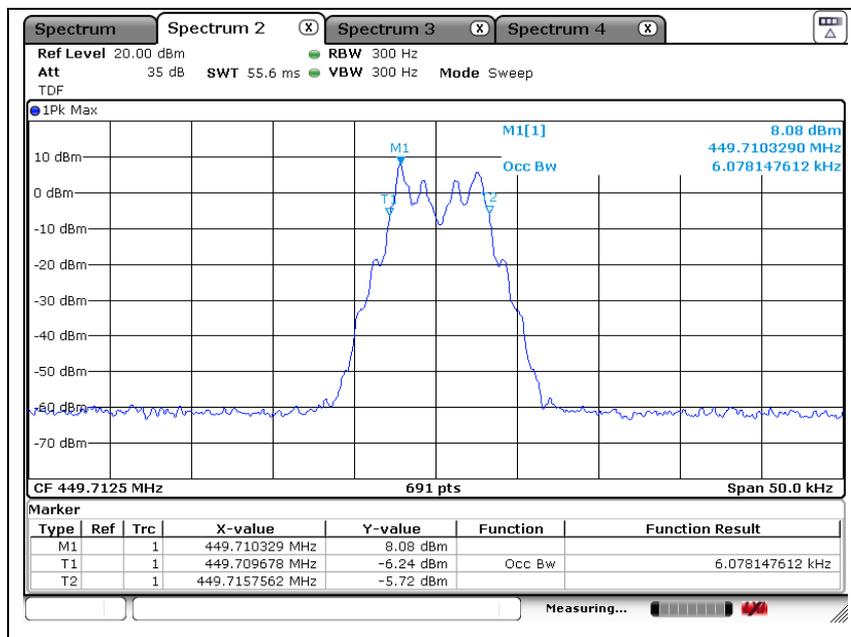

Test voltage(V _{d.c.})	F _L Frequency	F _H Frequency	99% bandwidth
V min = 5.4	449.709 7 MHz	449.715 8 MHz	6.08 kHz
V nom = 6.0	449.709 7 MHz	449.715 8 MHz	6.08 kHz
V max = 6.6	449.709 7 MHz	449.715 8 MHz	6.08 kHz

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

Test voltage : DC 5.4 V

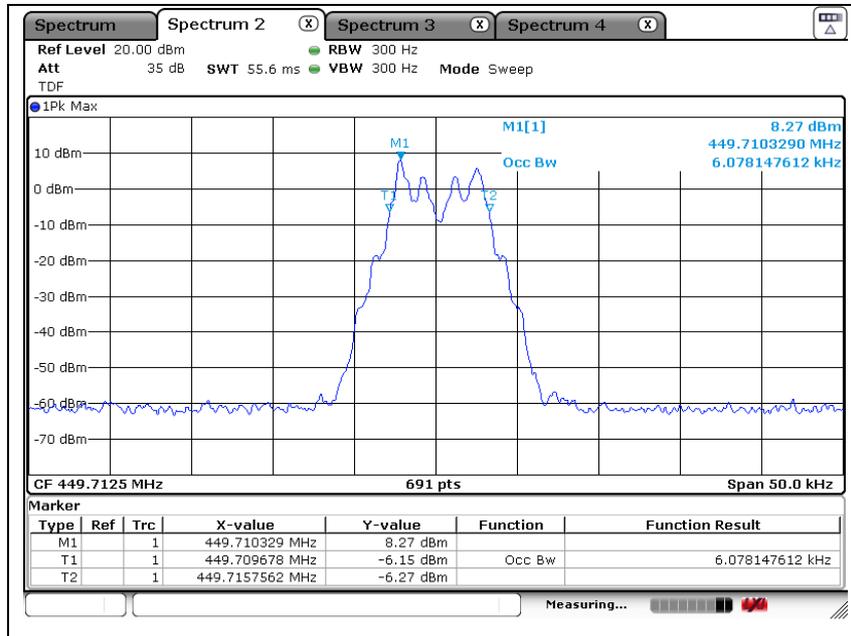

Test voltage : DC 6.0 V

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

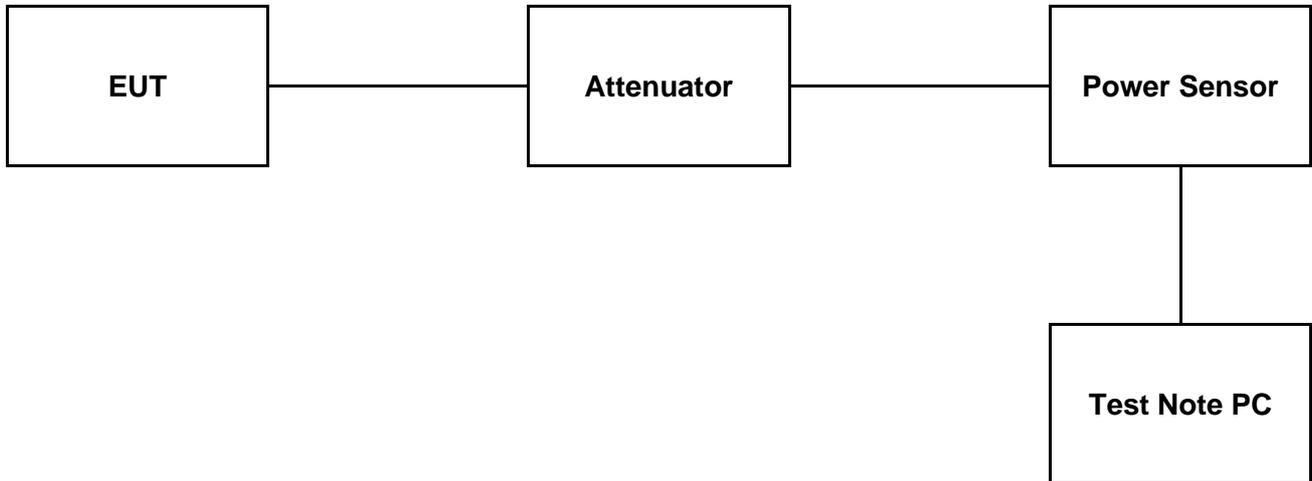

Test voltage : DC 6.6 V

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

4. Antenna power

4.1. Test setup

4.2. Limit

The antenna power shall be 10 μ W or less (The tolerances for antenna power shall be +20 % to -50 %).

4.3. Test procedure

1. Place the EUT on the table and set it in the transmitting mode.
2. Remove the antenna from the EUT and then connect a low loss RF cable from the antenna port to the Power sensor.
3. Test program : (S/W name : R&S Power Viewer, Version : 3.2.0)
4. Measure power at a designated channel.

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

4.4. Test result

Ambient temperature : (23 ± 1) °C
 Relative humidity : 47 % R.H.

- Test frequency: 449.712 5 MHz

Test voltage (V _{d.c.})	Declaration output power		E. I. R. P.	Antenna Gain	Output power		Power tolerance
	dBm	mW			dBm	mW	
V _{min} = 5.4	9.70 dBm	9.33 mW	5.70 dBm	-4.00 dBi	9.60 dBm	9.12 mW	-2.25 %
V _{nom} = 6.0	9.70 dBm	9.33 mW	5.70 dBm	-4.00 dBi	9.60 dBm	9.12 mW	-2.25 %
V _{max} = 6.6	9.70 dBm	9.33 mW	5.70 dBm	-4.00 dBi	9.59 dBm	9.10 mW	-2.47 %

Note;

Power tolerance = $\{[(O.P.)-(D.O.P.)] \div (D.O.P.)\} \times 100$

* O.P. : Output power , D.O.P. : Declaration output power

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

5. Adjacent-channel leakage power

5.1. Test Setup

5.2. Limit

As for the adjacent-channel leakage power in the 400 MHz band, the power radiated into the ± 4.25 kHz band of the frequency 12.5 kHz distant from the carrier frequency shall be lower than the carrier power by 40 dB or more.

5.3. Test Procedure

1. The EUT output is connected to a spectrum analyzer.
2. The EUT should be transmitted at a designated channel.
3. Set the spectrum analyzer in the following setting;
RBW : 300 Hz, VBW : 300 Hz, Span : 50 kHz.

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

5.4. Test result

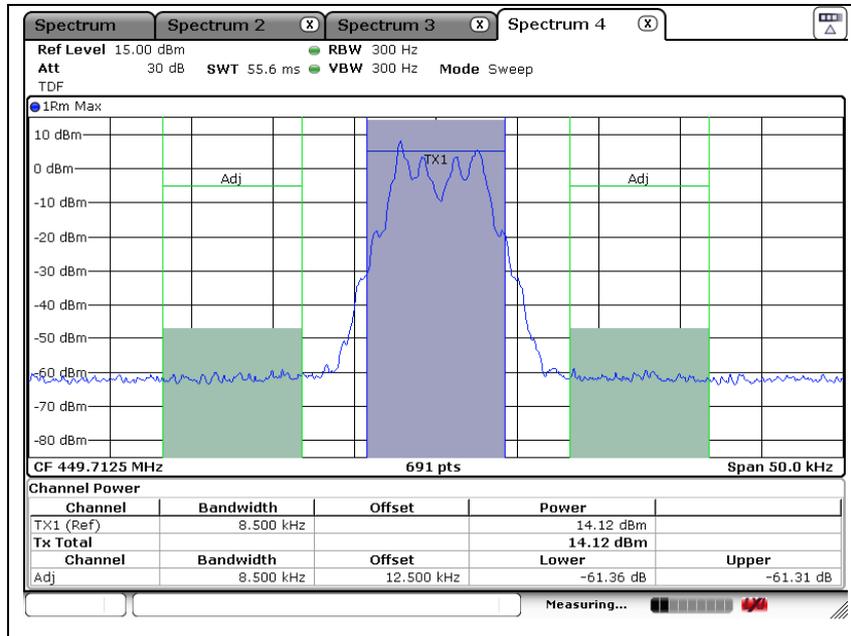

Ambient temperature : (23 ± 1) °C
 Relative humidity : 47 % R.H.

- Test frequency: 449.712 5 MHz

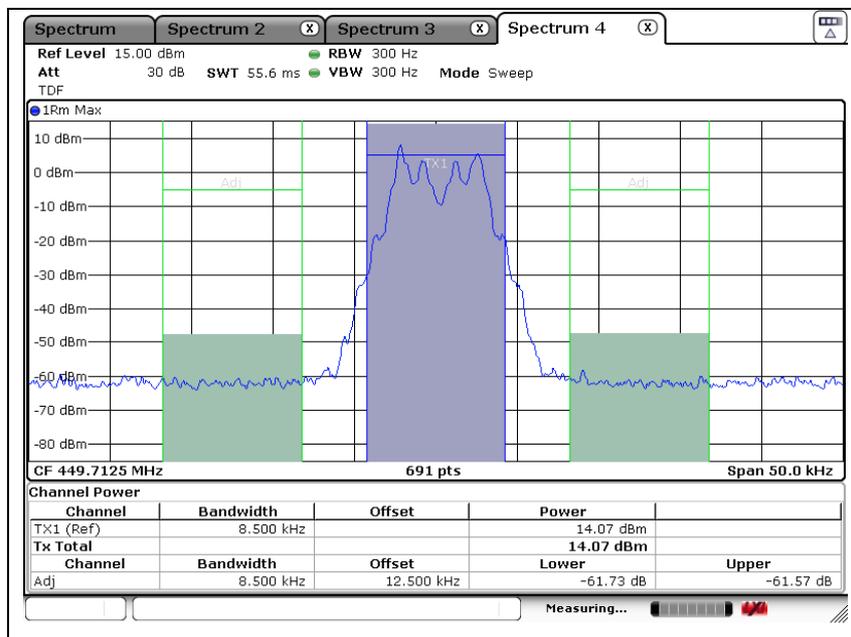

Test voltage(V _{d.c.})	Center frequency - 12.5 kHz	Center frequency + 12.5 kHz
V min = 5.4	61.36 dB	61.31 dB
V nom = 6.0	61.73 dB	61.57 dB
V max = 6.6	61.34 dB	61.41 dB

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

Test voltage : DC 5.4 V

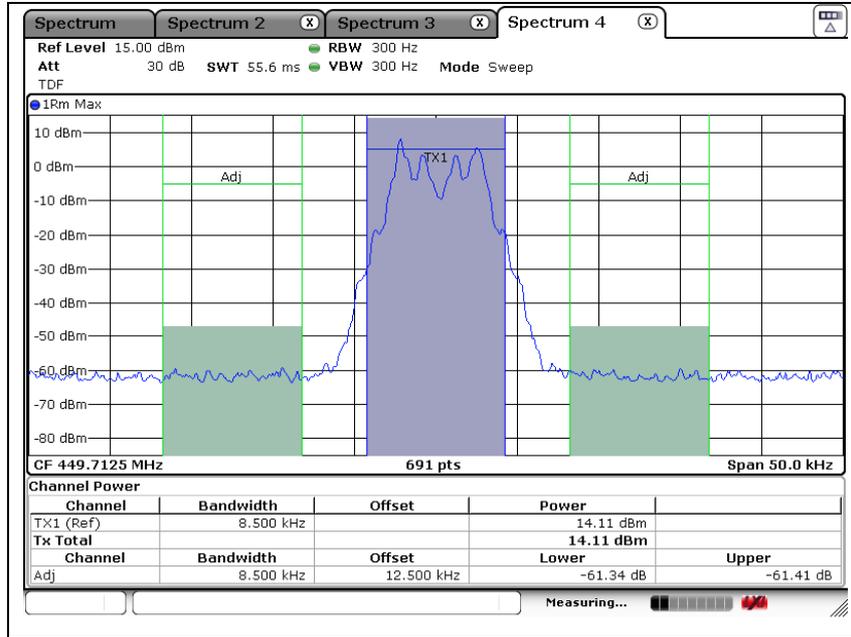

Test voltage : DC 6.0 V

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

Test voltage : DC 6.6 V

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

6. Intensity of spurious emission or unwanted emission

6.1. Test Setup

6.2. Limit

The permissible value of the intensity of spurious emissions in the out-of-band domain and the permissible value of the intensity of unwanted emissions in the spurious domain shall be $2.5 \mu W$ or lower (-26.02 dBm).

6.3. Test Procedure

1. The EUT output is connected to a spectrum analyzer.
2. The EUT should be transmitted at a designated channel.
3. Set the spectrum analyzer in the following setting;
 - Start : 30 MHz, Stop : $f_c - 62.5 \text{ kHz}$ – RBW 100 kHz,
 - Start : $f_c + 62.5 \text{ kHz}$, Stop : 1 000 MHz – RBW 100 kHz,
 - Start : 1 000 MHz, Stop : 5 000 MHz – RBW 1 MHz,
 - Sweep time : auto
4. For plots showing conducted spurious emissions, all path loss of wide frequency range was investigated and compensated to spectrum analyzer as correction function.
So, the reading values shown in plots were final result.

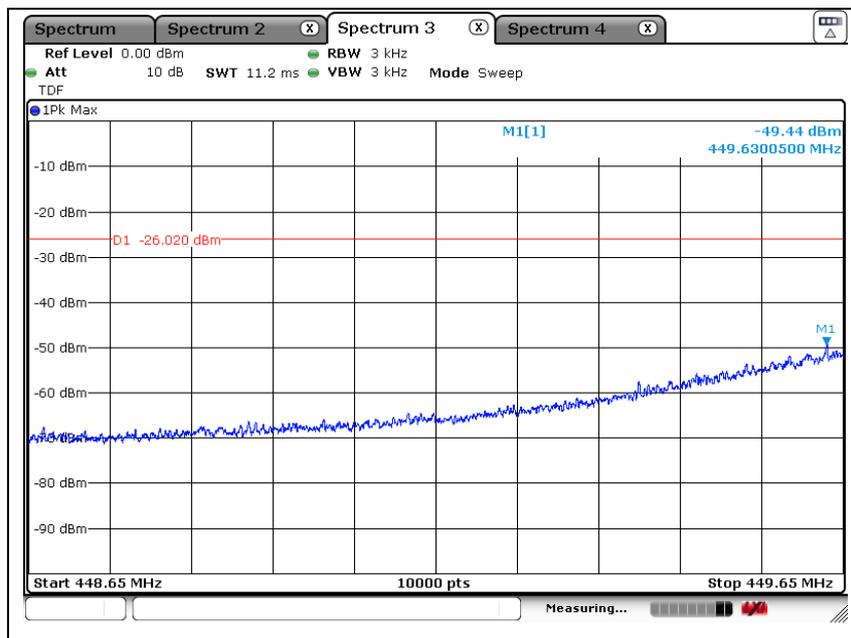

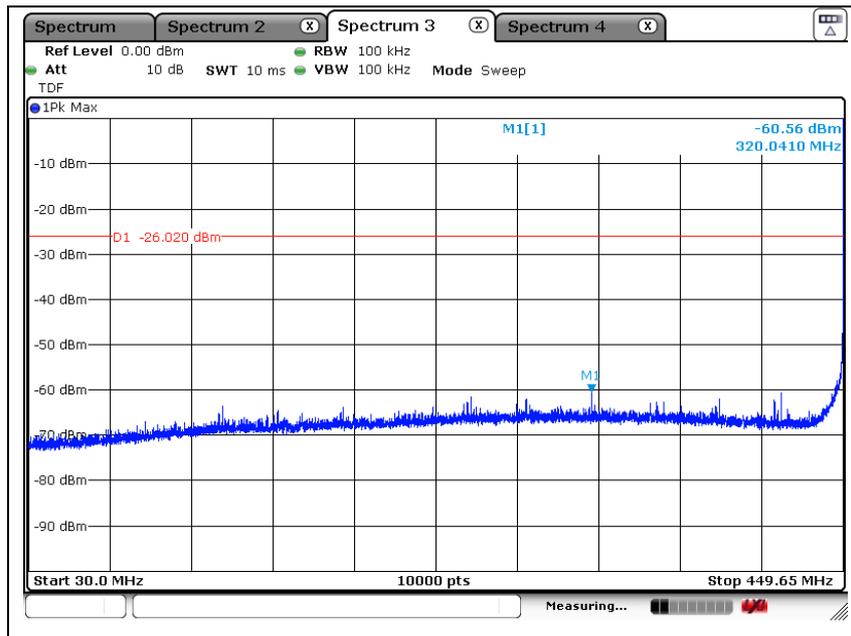

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

6.4. Test result

Ambient temperature : (23 ± 1) °C
 Relative humidity : 47 % R.H.

Test voltage : DC 5.4 V

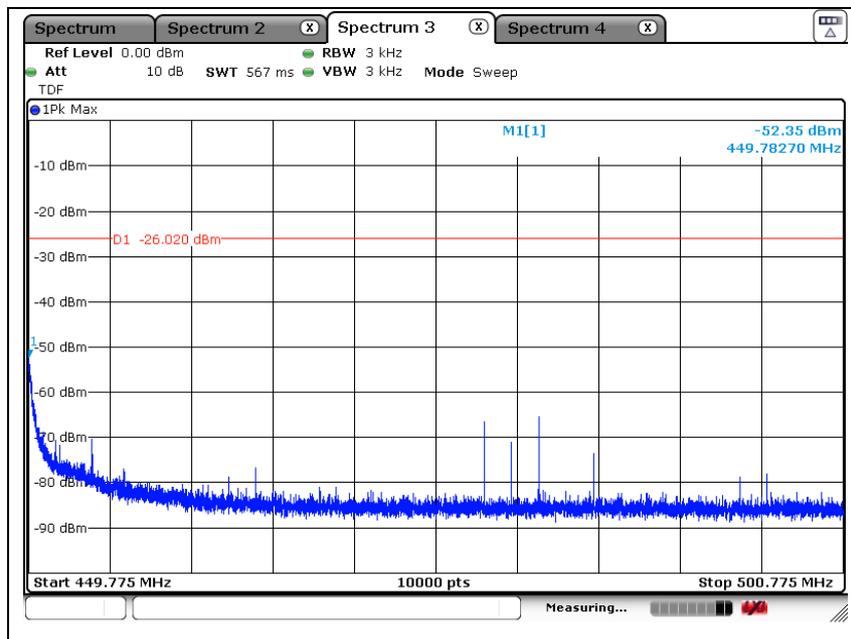

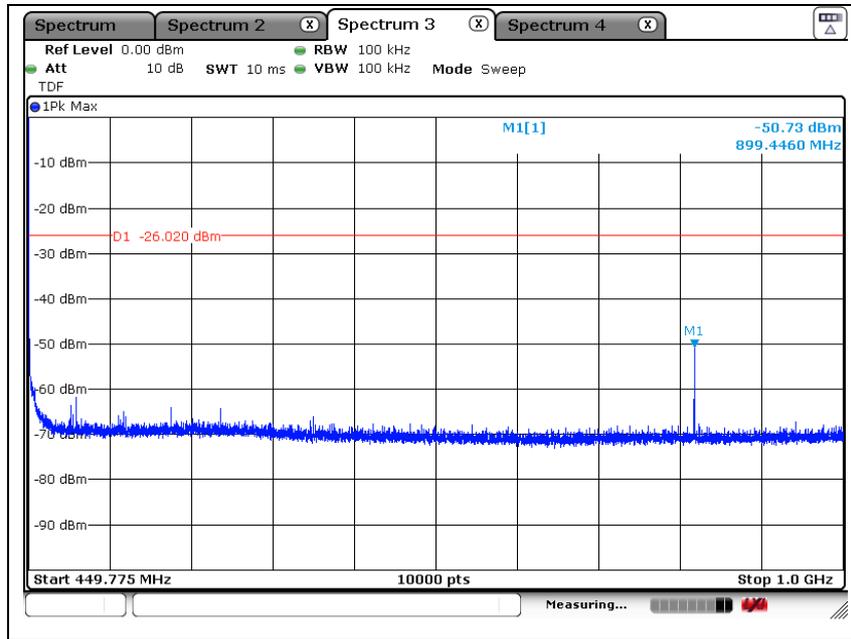

30 MHz ~ 449.65 MHz

$10 \cdot \log(100/3) = 15.23 \text{ dB}$, Final result = -34.21 dB m

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

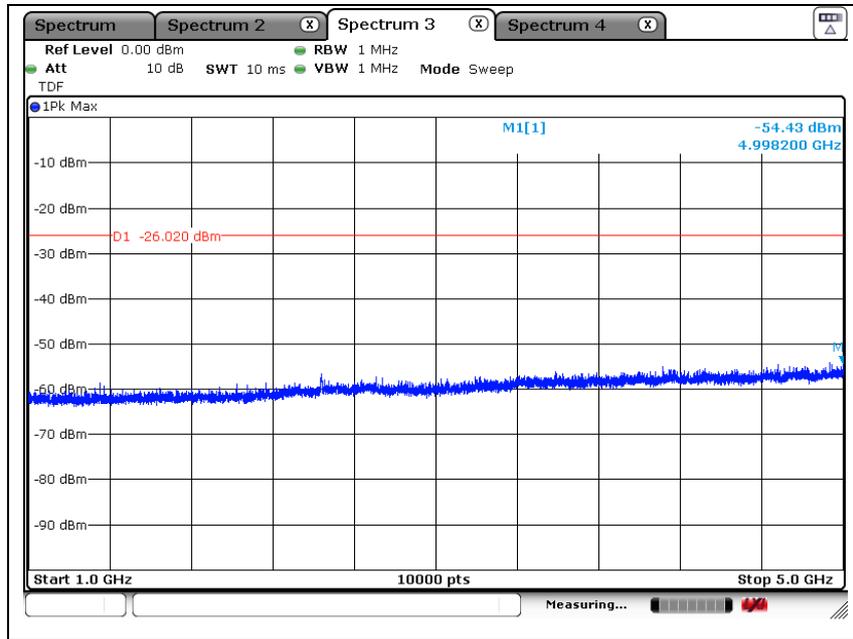

449.775 MHz ~ 1 000 MHz

$10 \cdot \log(100/3) = 15.23 \text{ dB}$, Final result = -37.12 dB m

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

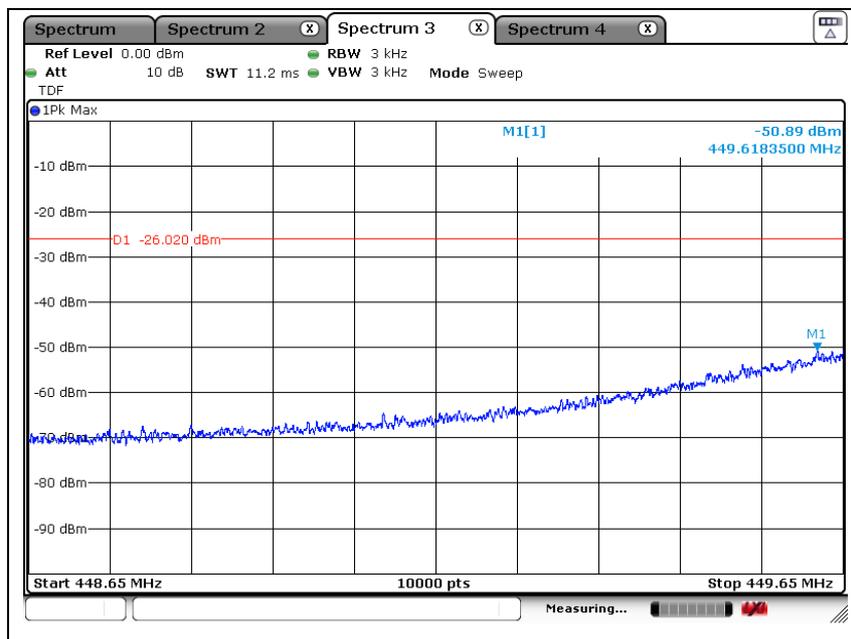

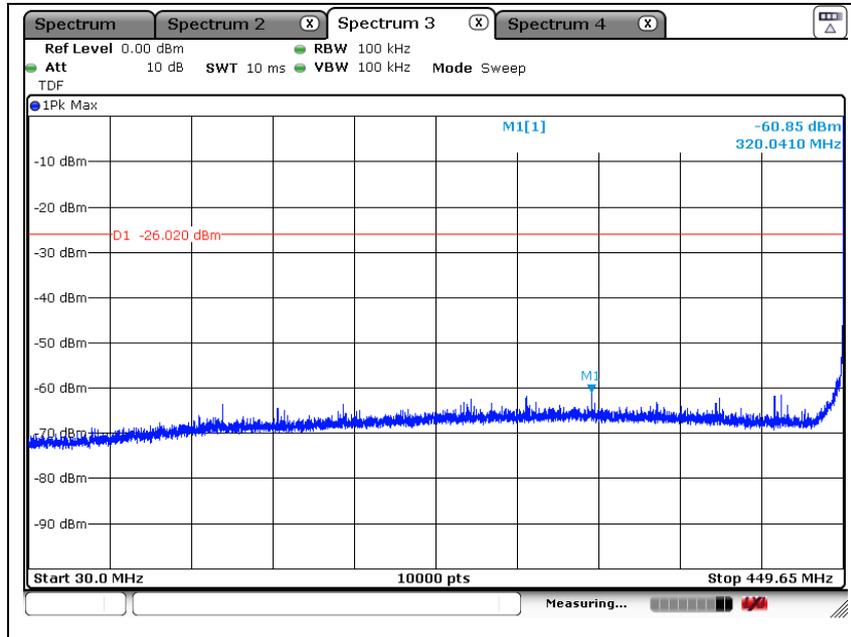

1 000 MHz ~ 5 000 MHz

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

Test voltage : DC 6.0 V

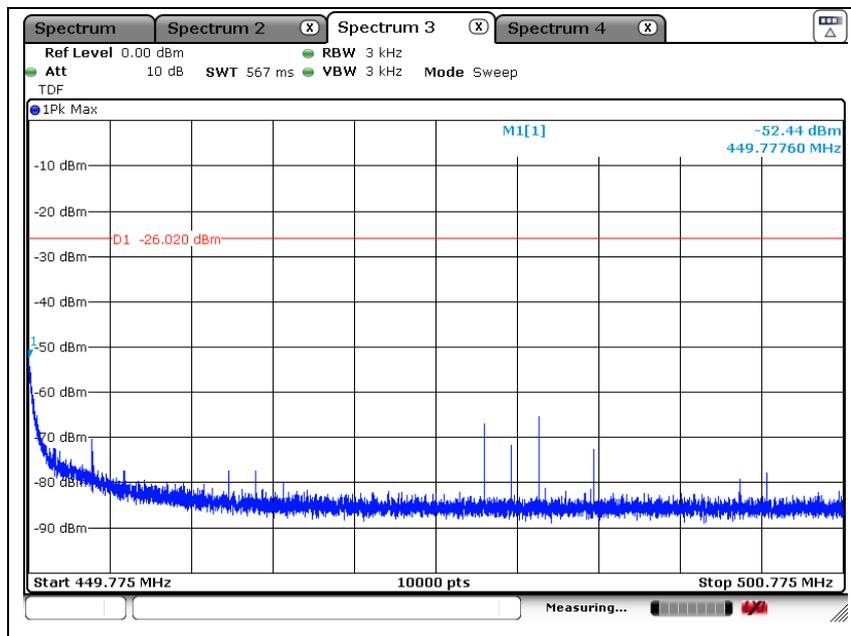

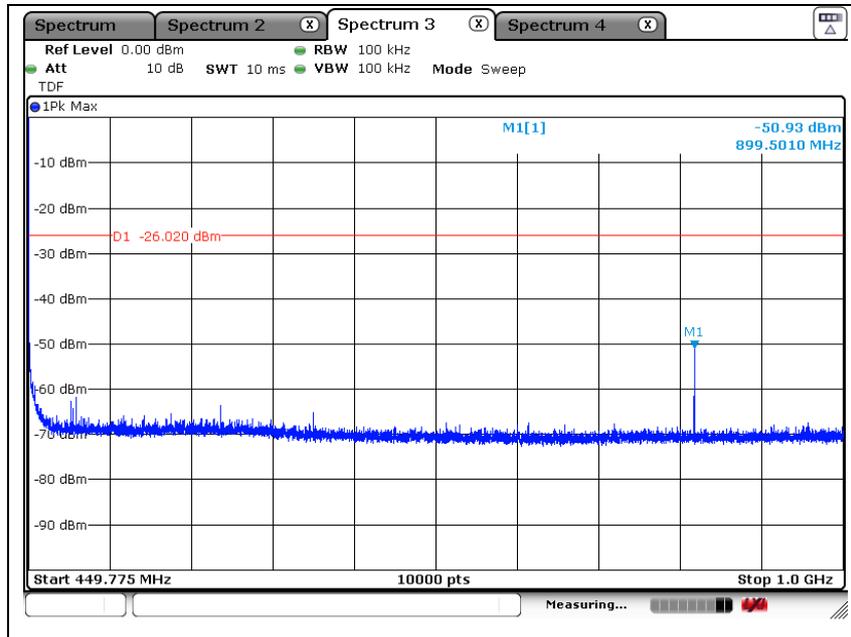

30 MHz ~ 449.65 MHz

$10 \cdot \log(100/3) = 15.23 \text{ dB}$, Final result = -35.66 dB m

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

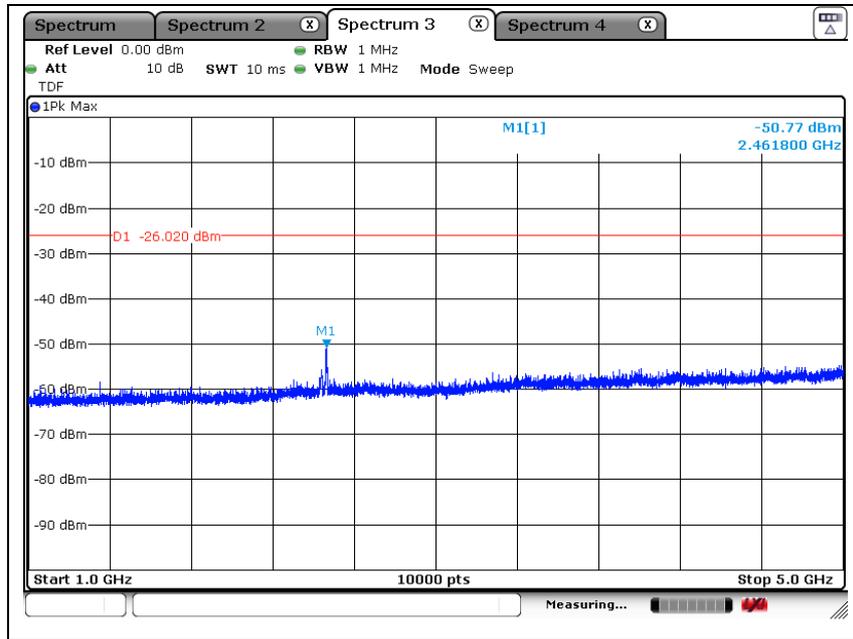

449.775 MHz ~ 1 000 MHz

$10 \cdot \log(100/3) = 15.23 \text{ dB}$, Final result = -37.21 dB m

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

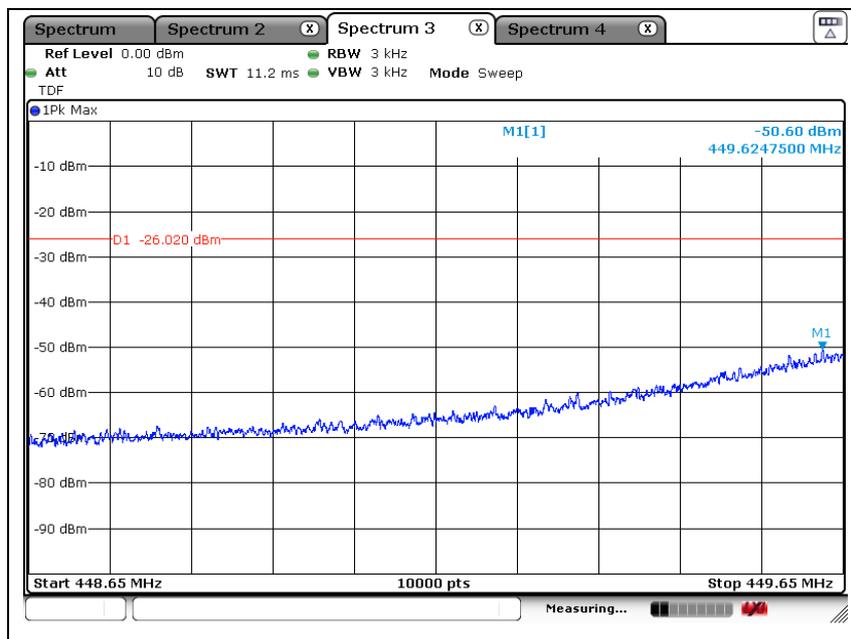

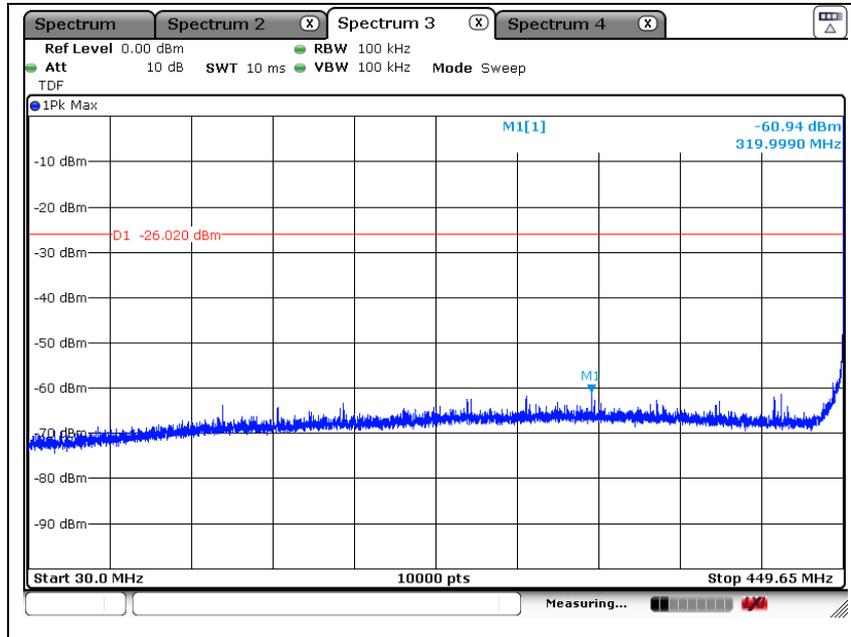

1 000 MHz ~ 5 000 MHz

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

Test voltage : DC 6.6 V

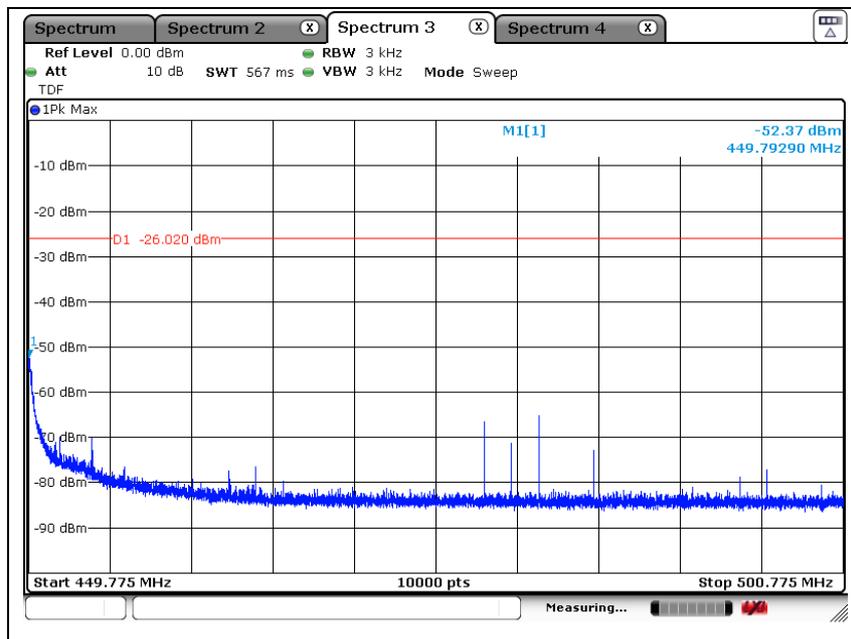

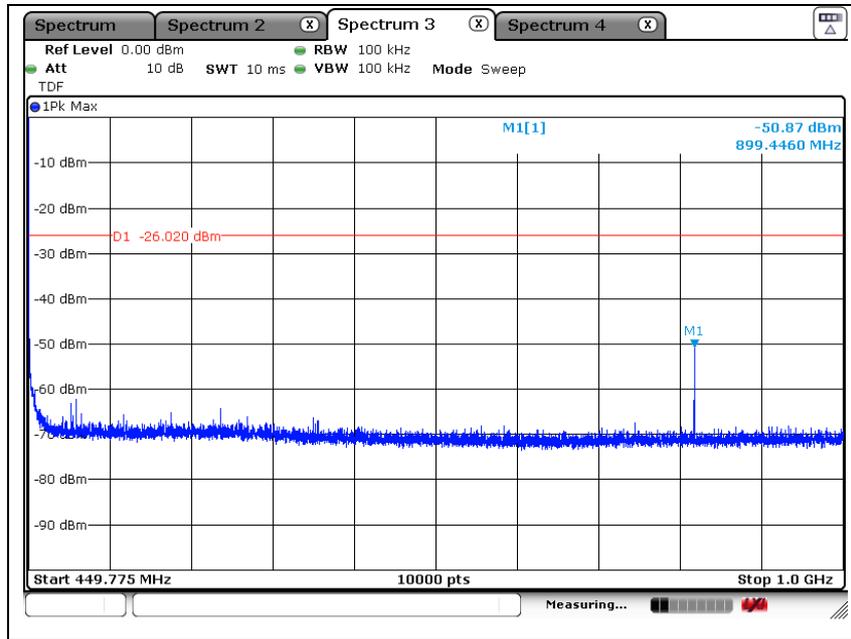

30 MHz ~ 449.65 MHz

$10 \cdot \log(100/3) = 15.23 \text{ dB}$, Final result = -35.37 dB m

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

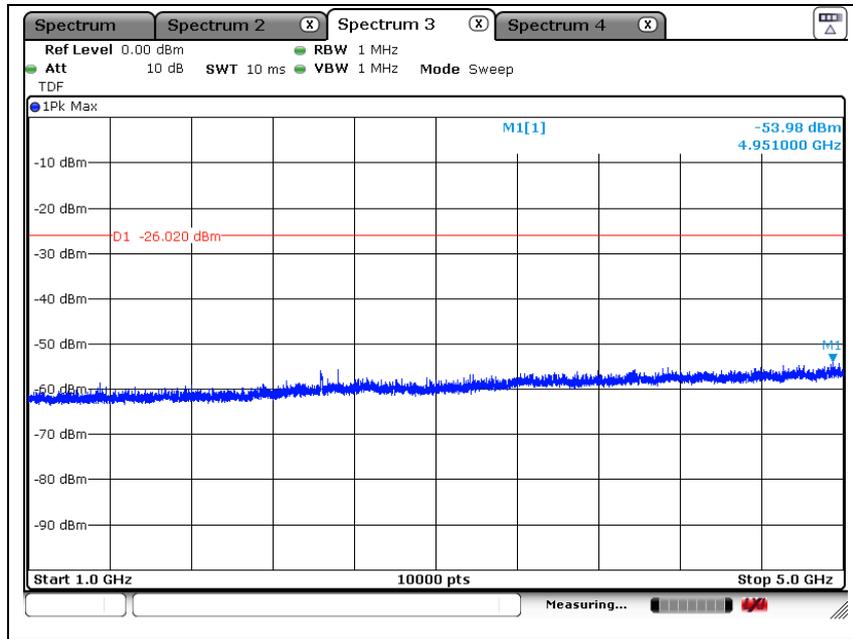

449.775 MHz ~ 1 000 MHz

$10 \cdot \log(100/3) = 15.23 \text{ dB}$, Final result = -37.14 dB m

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

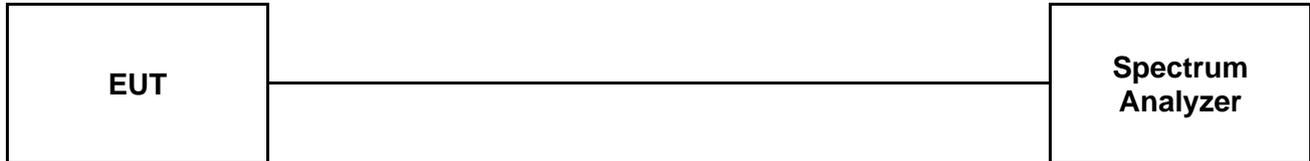

1 000 MHz ~ 5 000 MHz

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

7. Secondary unwanted emission strength

7.1. Test Setup

7.2. Limit

That limit on secondary emissions radiated from the receiving equipment shall be, in terms of the power of a dummy antenna circuit that has the same electrical constant as the receiving antenna, 4 nW or lower (-53.98 dBm) as measured using the circuit.

7.3. Test Procedure

1. The EUT output is connected to a spectrum analyzer.
2. The EUT should be transmitted at a designated channel.
3. Set the spectrum analyzer in the following setting;
 - RBW(=VBW) : 1 MHz(above 1 GHz), 100 kHz(below 1 GHz).
 - Sweep time : auto, Start : 30 MHz, Stop : 1 GHz
 - Sweep time : auto, Start : 1 GHz, Stop : 5 GHz
4. For plots showing conducted spurious emissions, all path loss of wide frequency range was investigated and compensated to spectrum analyzer as correction function.
So, the reading values shown in plots were final result.

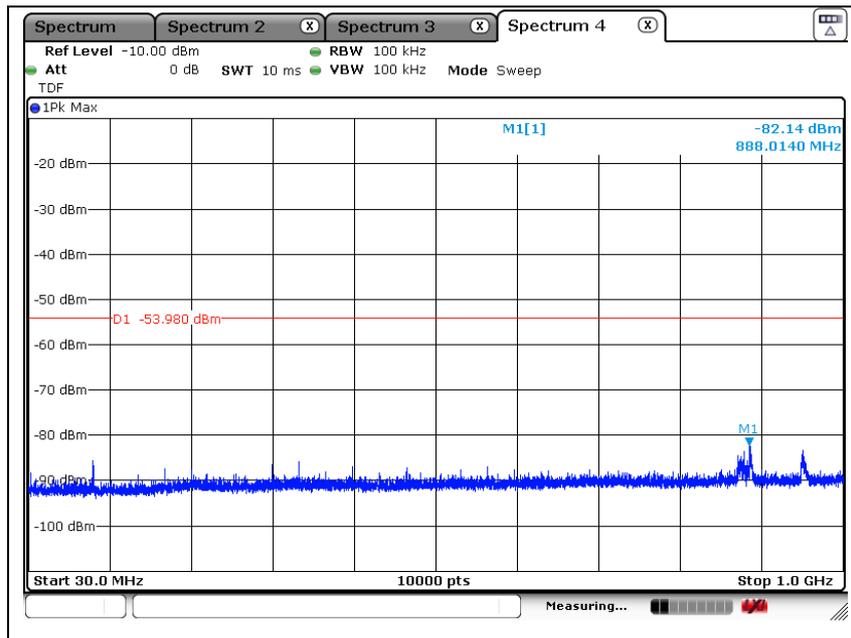

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

7.4. Test result

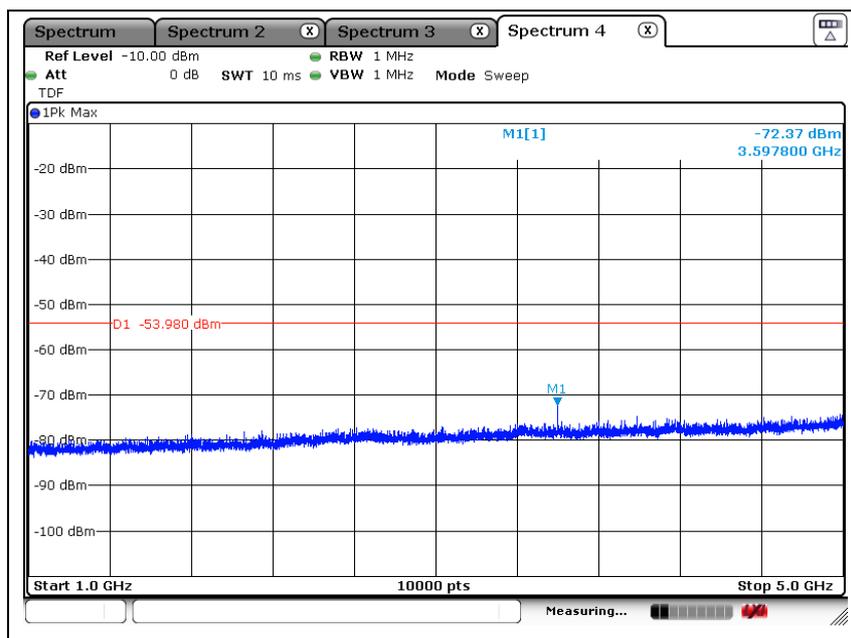

Ambient temperature : (23 ± 1) °C
 Relative humidity : 47 % R.H.

Test voltage : DC 5.4 V

30 MHz ~ 1 000 MHz

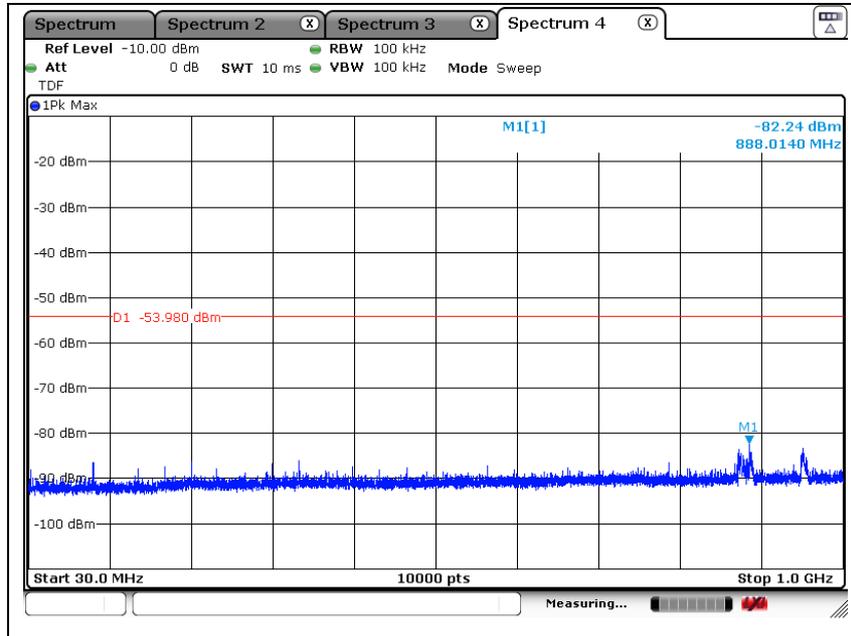

1 000 MHz ~ 5 000 MHz

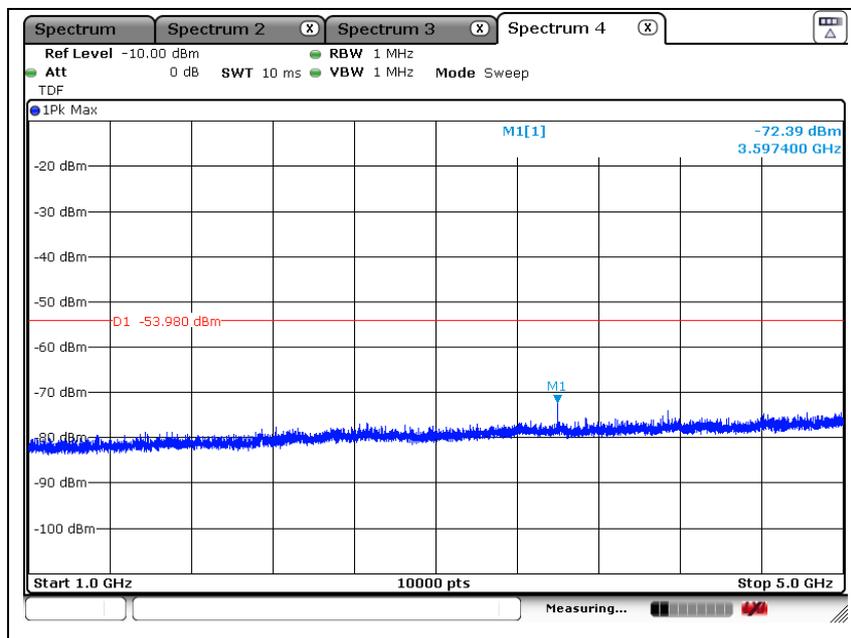

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

Test voltage : DC 6.0 V

30 MHz ~ 1 000 MHz

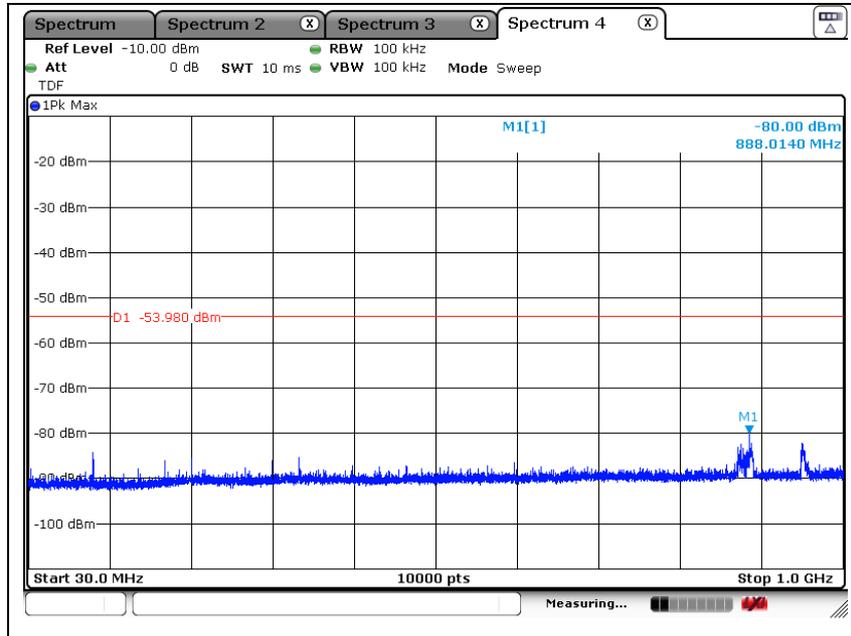

1 000 MHz ~ 5 000 MHz

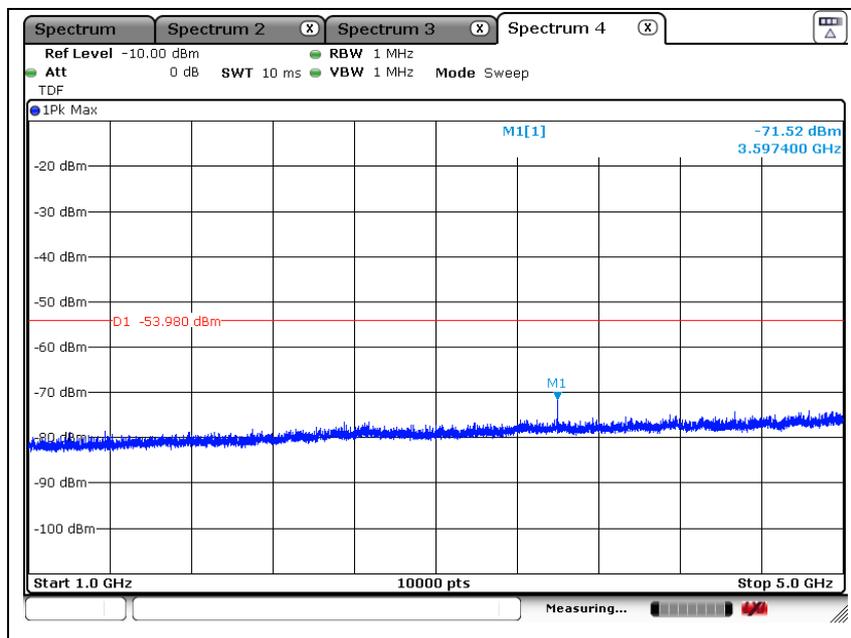

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

Test voltage : DC 6.6 V

30 MHz ~ 1 000 MHz

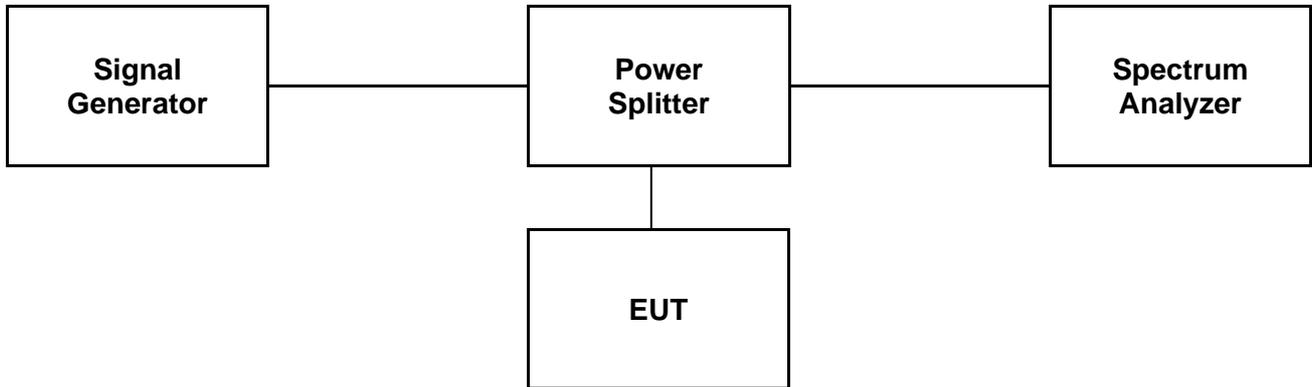

1 000 MHz ~ 5 000 MHz

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

8. Carrier sensing

8.1. Test Setup

8.2. Limit

A circuit shall be considered idle when the voltage induced in an antenna with an absolute gain of 2.14 dB is 3.55 μV (-96 dB m) in the 400 MHz band

8.3. Test Procedure

1. The EUT output is connected to a spectrum analyzer.
2. The carrier from signal generator be transmitted when the EUT should be transmitted at a designated channel.
3. Set the spectrum analyzer in the following setting;
RBW : 300 Hz, VBW : 300 Hz, Span : 50 kHz
4. Confirm EUT detected carrier wave or not

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

8.4. Test result

Ambient temperature : (23 ± 1) °C

Relative humidity : 47 % R.H.

- Test frequency: 449.712 5 MHz

Test voltage(V _{d.c.})	Carrier sensing Detection
V nom = 6.0	-100.97 dB m

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

9. Transmission time

9.1. Test Setup

9.2. Limit

Transmission time : 40 sec or less
Quiescence time : 2 sec or more

9.3. Test Procedure

1. The EUT output is connected to a spectrum analyzer.
2. The EUT should be transmitted at a designated channel.
3. Set the spectrum analyzer in the following setting;
 - Span : 0 Hz
 - RBW(=VBW) : 100 kHz
 - Sweep time : 50 s
 - Y axis : 10 dB/Div
 - Detector : Positive peak
 - Trigger : Rise

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.

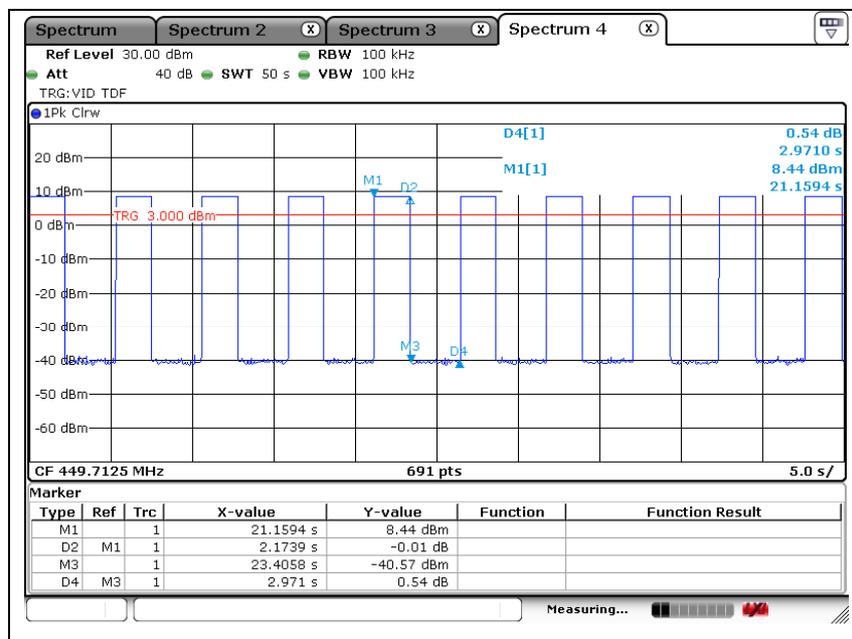

9.4. Test result

Ambient temperature : (23 ± 1) °C
 Relative humidity : 47 % R.H.

- Test frequency: 449.7125 MHz

Test voltage(V _{d.c.})	Transmission time	Quiescence time
V nom = 6.0	2.17 s	2.97 s

Test voltage : DC 6 V

The results shown in this test report refer only to the sample(s) tested unless otherwise stated. This test report cannot be reproduced, except in full, without prior written permission of the Company. This test report does not assure KOLAS accreditation.
